

GAME OF THRONES

ROYAL RESERVE COLLECTION

A BEER FOR DAENERYS

MOTHER OF DRAGONS

The Collection

Packaged as a series, with simple, elegant iconography and a unified graphic direction, each beer in the collection will be brewed and blended with ingredients selected to match the character and temperament of the hero in question, designed and brewed as our interpretation of what a royal brewer might have brewed for their noble master.

The Beer

A rich blend of a smoked porter and a Belgian kriel, our *Mother of Dragons* is brewed to honor a leader who takes what is hers with fire and blood!

Tasting Notes

Mother of Dragons pours black with hints of a deep ruby-hue near the edge of the glass. Aromas of chocolate covered cherries lead to subtle notes of smoke. The flavor follows the aroma with tart cherry leading the way, then quickly resolving to dark chocolate and roasted malt. Medium-bodied with a creamy mouthfeel throughout, the finish leaves you with a touch of bittersweet cocoa and just a hint of smoke.

Food Pairings

Pair with smoked gouda and charcuterie. Excellent with red meat and game meat. For dessert, pair with flourless chocolate cake or cherry cheese cake.
