DON'T FEED THE SPLENDID MØOSE

NORTHEAST STYLE PALE ALE

"... Stay now, gentle beast, I murmured as I reached a trembling hand out to the enormous moonlight-colored moose. He bowed his head, and shortly, after some coaxing, I scabbled up upon his back. I had traveled to the farthest northeast corner of the country in search of a mythical Pale Ale that could soothe even the most maddened mind. But my feet were sore from walking. And as I always say, you can't beat travel by ghost-mooseback ..."

Boston, Massachusetts

Our Northeast Pale Ale is brewed with a copious amount of Citra hops and both Pilsner and Pale malts to give a super hazy and juicy color to the beer. Bright oranges fall on the nose with a smooth, citrus flavor on the palate. If you close your eyes, you just might think this beer was juiced rather than brewed.
